OUR PURPOSE

Some insight into the vision, goals, and purpose of Tonal Integrative Correction

1

WHAT WE DO:

Our sole purpose is to detect and remove the vertebral subluxation complex (VSC) throughout the spine and nervous system. When VSC is removed, the body is able to adapt to stress (physical, chemical, and emotional) **quicker and more appropriately**. In turn, the body is able to heal at a higher **capacity**. We are dedicated to teaching people **about the consequences of VSC that prevent the body from healing and self regulating**.

2

WHY WE DO IT:

We do it because we believe **that our bodies were created to be healthy and not sick**, because “surviving” or “not being diseased” is not the same as being “healthy.” We believe that every man, woman, and child deserves to live a life free from nervous system interference and to have a body that is fully capable of experiencing life to his or **her fullest potential**.

3

WHAT OUR GOAL IS FOR YOU:

We want you to take back responsibility for your health. Instead of waiting for something to go wrong with your body we want you to build such a **condition of health that your body cannot sustain a condition of disease**. We want to see your health rise above the common expected statistics we see in health surveys today.
